Special Issue on Materials Forming Technology

Call for Papers

Metal Forming and Materials Modelling works on a range of metal forming processes, such as rolling, forging, extrusion, sheet metal forming, warm forming, hot-stamping and cold-die quenching for boron steel and Aluminium alloys, creep age forming, spin-forming, cross-wedge rolling, etc. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of materials forming technology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring materials forming technology. Potential topics include, but are not limited to:

- Welding molding and control
- Casting molding and control
- Pressure processing and control
- Mold design and manufacturing
- Metal forming
- Advanced methods in material forming

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Materials Forming Technology” should be selected during your submission.

Special Issue Timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>April 25th, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>June 2019</td>
</tr>
</tbody>
</table>
