Special issue on Microbial Enzyme: Applications in Industry and in bioengineering

Call for Papers

Enzyme is a kind of biological catalyst. Most enzymes are proteins. All of the enzyme contain four elements: C, H, N, O. Organisms contain countless types of enzymes. Almost all chemical reactions in a biological cell need enzymes in order to occur at rates sufficient for life.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Microbial Enzyme: Applications in Industry and in bioengineering.

Authors should read over the journal’s Authors' Guidelines carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special issue - Microbial Enzyme: Applications in Industry and in bioengineering” should be chosen during your submission.

According to the following timetable:
