Special Issue on Advances in Structural Engineering

Call for Papers

Structural engineering is a specialty within the field of civil engineering which focuses on the framework of structures, and on designing those structures to withstand the stresses and pressure of their environment and remain safe, stable and secure throughout their use. It is a creative profession that makes a significant contribution to infrastructure, industry, as well as residential and recreational developments.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring advances in structural engineering. Potential topics include, but are not limited to:

- Earthquake engineering
- Steel and concrete structural Design
- Smart structures
- Structural management
- Active and passive control of structures
- Structural dynamics
- Composite structures
- Finite element analysis
- Soil structure interaction
- Computer aided design of structures
- Non destructive testing of structures

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Advances in Structural Engineering” should be selected during your submission.

Special Issue timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>February 6th, 2016</th>
</tr>
