Special Issue on Construction Engineering

Call for Papers

Construction engineering is the engineering entity that covers the construction of various housing buildings and their ancillary facilities and the installation of their supporting lines, pipes and equipment. Its contents include engineering mechanics, soil mechanics, surveying, housing construction and structural engineering. The purpose of the construction engineering is to build more livable buildings for the residents, corresponding buildings for all walks of life, infrastructure construction and so on.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring construction engineering. Potential topics include, but are not limited to:

- Construction budget
- Installation engineering
- Construction management
- Investigation, design and construction
- Construction material
- Construction technology
- Building model

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Construction Engineering” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>February 27th, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>April 2019</td>
</tr>
</tbody>
</table>
