Special Issue on Concrete Technologies

Call for Papers

From the history of modern human engineering, the concrete structure is a new structure relative to the masonry structure, wood structure and steel structure, and its application is only more than 100 years old. Modern reinforced concrete can contain varied reinforcing materials made of steel, polymers or alternate composite material in conjunction with rebar or not. In many countries, high strength steel and high strength concrete have been used in large span, heavy and high rise structures, and good results have been achieved in reducing weight and saving steel. The research and development of high performance concrete technology has made a great breakthrough to the technical performance of the traditional concrete. It has great significance to energy saving, engineering quality, engineering economy, environment and labor protection.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring concrete technologies. Potential topics include, but are not limited to:

- Precast concrete technology
- Recycled concrete technology
- Concrete performance research
- Concrete curing and anti-corrosion
- Reinforced concrete structure
- Green and high performance concrete technology
- Prestressed concrete structure
- Concrete pouring process
- Concrete building materials

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Concrete Technologies” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>June 20th, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>August 2019</td>
</tr>
</tbody>
</table>
