Special Issue on

Trauma, Acute Care and Emergency Surgery

Call for Papers

Trauma surgery is a surgical specialty that utilizes both operative and non-operative management to treat traumatic injuries, typically in an acute setting.

Acute care is a branch of secondary health care where a patient receives active but short-term treatment for a severe injury or episode of illness, an urgent medical condition, or during recovery from surgery.

Emergency surgery is surgery to treat trauma or acute illness subsequent to an emergency presentation. The patient may require immediate surgery or present for surgery at a later time following this unplanned presentation.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Trauma, Acute Care and Emergency Surgery. Potential topics include, but are not limited to:

- Emergency and critical care
- Surgical treatment and management for acute diseases
- Postoperative care
- Acute treatment of traumatic injuries
- Management of acute bleeding
- Acute diseases during perioperative period
- Acute pain management
- Post-traumatic disorders and treatment

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Trauma, Acute Care and Emergency Surgery” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>March 28th, 2019</th>
