Special Issue on Financial Modeling

Call for Papers

Financial modeling is the task of building an abstract representation (a model) of a real world financial situation. This is a mathematical model designed to represent the performance of a financial asset or portfolio of a business, project, or any other investment. Typically, financial modeling is understood to mean an exercise in either asset pricing or corporate finance, of a quantitative nature. In other words, financial modeling is about translating a set of hypotheses about the behavior of markets or agents into numerical predictions.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on financial modeling. Potential topics include, but are not limited to:

- Quantitative finance
- Portfolio optimization
- Business valuation
- Capital budgeting
- Financial forecast
- Option pricing

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Financial Modeling” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>March 9th, 2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>May 2018</td>
</tr>
</tbody>
</table>
