

Special Issue on Geoscience of the Built Environment

Call for Papers

Currently built environment is typically used to describe the interdisciplinary field, which includes environmental planning, policy development and land-use planning, and so on. Built environment influences on global climate change, air and water quality, and energy, which are relative to the earth system. The goal of this special issue is to provide a platform for scientists and academicians all over the world to discuss various issues in the area of built environment effecting on geoscience.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Geoscience of the Built Environment**. Potential topics include, but are not limited to:

- Building Materials
- Pollution Monitoring
- Environmental Impact
- Architecture
- Earth Sustainability
- Land Use
- Earth System

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Geoscience of the Built Environment**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 20th, 2017
Publication Date	August 2017
