

Special Issue on Geosciences and Future Earth

Call for Papers

Future Earth is a 10-year international research program which aims to build knowledge about the environmental and human aspects of Global change, and to find solutions for sustainable development. It's very important for future earth to make a study of geoscience. The goal of this special issue is to provide a platform for scientists and academicians all over the world to discuss various issues in the area of future earth effecting on geoscience.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Geosciences and Future Earth**. Potential topics include, but are not limited to:

- Geomorphology
- Petrology
- Mineralogy
- Structural Geology
- Stratigraphy
- Glaciology
- Environmental Geology
- Sedimentology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Geosciences and Future Earth**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 20th, 2017
Publication Date	October 2017
