

Special Issue on Waste Disposal, Recycling and Management

Call for Papers

There are many options for the treatment and disposal of medical waste. Some work best in large facilities appropriate to major hospitals or centralized facilities, and others are best for low to middle income countries, small facilities and resource constrained settings. The first step in any waste management is to minimise waste and to ensure that it is properly segregated at source. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **waste disposal, recycling and management**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **waste disposal, recycling and management**. In this special issue, potential topics include, but are not limited to:

- Infectious waste treatment
- Pharmaceutical waste treatment
- Hazardous waste management
- Radioactive waste treatment
- Waste management system
- Waste handling and separation
- Separation and processing and transformation of solid wastes
- Transfer and transport

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Waste Disposal, Recycling and Management**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 28th, 2018
Publication Date	April 2018

Guest Editor:

Prof. Valentine Udoh James, Fluorotronics Inc., USA
