**Special Issue on**  
**Environmental Pollutant Monitoring and Analysis**

**Call for Papers**

Environmental monitoring describes the processes and activities that need to take place to characterise and monitor the quality of the environment. Environmental monitoring is used in the preparation of environmental impact assessments, as well as in many circumstances in which human activities carry a risk of harmful effects on the natural environment. All monitoring strategies and programmes have reasons and justifications which are often designed to establish the current status of an environment or to establish trends in environmental parameters. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **environmental pollutant monitoring and analysis**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **environmental pollutant monitoring and analysis**. In this special issue, potential topics include, but are not limited to:

- Heavy metals detection
- Waste water analysis
- Exhaust gas analysis
- Pesticide residue analysis
- Heavy metal analysis
- Light pollution analysis
- Waste gas analysis

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Pollutant Monitoring and Analysis**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	February 9th, 2016
Publication Date	April 2016

**Guest Editor:**

**Scientific Research**  
*Open Access*

**Journal of  
Environmental Protection**  
ISSN Online: 2152-2219
