

Special Issue on Environmental Degradation Research

Call for Papers

Environmental degradation is the disintegration of the earth or deterioration of the environment through consumption of assets, for example, air, water and soil; the destruction of environments and the eradication of wildlife. It is characterized as any change or aggravation to nature's turf seen to be pernicious or undesirable. Ecological effect or degradation is created by the consolidation of an effectively substantial and expanding human populace, constantly expanding monetary development or per capita fortune and the application of asset exhausting and polluting technology. It occurs when earth's natural resources are depleted and environment is compromised in the form of extinction of species, pollution in air, water and soil, and rapid growth in population.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **environmental degradation research**. In this special issue, potential topics include, but are not limited to:

- Land disturbance
- Deterioration of the environment
- Depletion of natural resources
- Environmental impact
- Destroyed natural habitats
- Increasing human population
- Environmental degradation
- Effects of environmental degradation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - Environmental Degradation Research**" should be selected during your submission.

Special Issue timetable:

Submission Deadline	July 7th, 2016
Publication Date	September 2016

Guest Editor:

Scientific Research
Open Access

**Journal of
Environmental Protection**
ISSN Online: 2164-2753
