

Special Issue on Environment Pollution and Toxicology

Call for Papers

Environmental Toxicology is defined as the study of the fate and effects of chemicals in the environment. Although this definition would encompass toxic chemicals naturally found in the environment (i.e., animal venom, microbial and plant toxins), environmental toxicology is typically associated with the study of environmental chemicals of anthropogenic origin. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of environment pollution and toxicology.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **environmental pollution and toxicology**. In this special issue, potential topics include, but are not limited to:

- Sources of environmental toxicity
- Environmental toxicology and safety
- Environmental toxicology and monitoring
- Environmental toxicology analysis
- Food toxicology and metal toxicology
- Drug toxicology and radiation toxicology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Environmental Pollution and Toxicology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 25th, 2017
Publication Date	March 2017
