

Special Issue on Intelligent Transportation System

Call for Papers

Traffic safety, traffic congestion and environmental pollution are three major problems in the field of international traffic, especially traffic safety. The use of intelligent transportation technology to improve the level of road management can significantly reduce the incidence of traffic accidents. Intelligent Transportation System (ITS) is the development direction of future traffic system. It integrates advanced information technology, data communication transmission technology, electronic sensing technology, control technology and computer technology into the whole ground traffic management system. It has the following two characteristics: one is to focus on the wide application and service of traffic information; the other is to improve the operational efficiency of existing traffic facilities.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **intelligent transportation system**. Potential topics include, but are not limited to:

- Intelligent Transportation Technologies
- ITS design
- ITS evaluation
- ITS network
- Intelligent transportation development mode
- Green transportation system
- Transportation construction
- ITS applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Intelligent Transportation System**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 20th, 2019
Publication Date	May 2019

Guest Editor:

Scientific Research
Open Access

**Journal of Transportation
Technologies**
ISSN Online: 2160-0481
