Special Issue on

Computer Technology in Medical Practice

Call for Papers

In modern medicine, computers are widely used in medical information processing, medical imaging, surgery assistance.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Computer Technology in Medical Practice. Potential topics include, but are not limited to:

- Computer-aided diagnosis, treatment and surgery
- Computer-assisted health monitoring
- Data collection, analysis and modelling
- Artificial intelligence and clinical practice
- Electronic health record and services
- Medical imaging
- Biomedical and health Informatics
- Telehealth
- Decision support system
- Medical Software Systems
- Software for medical management

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Computer Technology in Medical Practice” should be chosen during your submission.

According to the following timetable:
