Special Issue on Economics and Financial Modelling

Call for Papers

Financial modeling is the task of building an abstract representation (a model) of a real world financial situation. This is a mathematical model designed to represent the performance of a financial asset or portfolio of a business, project, or any other investment. An economic model is a hypothetical construct that embodies economic procedures using a set of variables in logical and/or quantitative correlations. It is a simplistic method using mathematical and other techniques created to show complicated processes.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Economics and Financial Modelling. Potential topics include, but are not limited to:

- Quantitative methods and Analysis
- Economics and analysis models
- Investment strategy and model
- Asset pricing and option pricing
- Prices model and volatility model
- Portfolio optimization
- Analysis of interest rates
- Modeling for business and trade
- Capital budgeting
- Financial forecast and Profitability
- Stochastic models
- Stock returns analysis

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue –Economics and Financial Modelling” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>December 13th, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>February 2020</td>
</tr>
