Special Issue on Applied Economics

Call for Papers

Applied economics is the application of economic theory and econometrics in specific settings. As one of the two sets of fields of economics, it is typically characterized by the application of the core, i.e. economic theory and econometrics, to address practical issues in a range of fields. The process often involves a reduction in the level of abstraction of this core theory.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Applied Economics. Potential topics include, but are not limited to:

- Labor and population economics
- Organization and business economics
- Agricultural economics
- Development and trade economics
- Education economics
- Health economics
- Human factor and economics
- Public economics
- Resource and environmental economics
- Products and economic analysis
- Manufacturing and industrial economics
- Regional and household economics
- Policy analysis

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Applied Economics” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>January 14th, 2020</th>
