Subject Coverage This journal invites original research and review papers that address the following issues in operations research. Topics of interest include, but are not limited to:

1. Operations Research and Optimization Theory and Research Planning and Scheduling **Technical Approaches** Quality Management Revenue Management Computational Intelligence and Information Management Supply Chain Management Continuous Optimization **Discrete Optimization** 3. Interfaces with Other Disciplines Decision Support Systems, Multi-criteria Decision Methods Community Operations Research Expert Systems Education Operations Research Heuristics Mathematical Programming Environmental and Energy Issues Networks Financial Engineering Queues Government Operations Research Simulation Health Services Operations Research Stochastic Models and Statistics Marketing Science Time Series Analysis Military and Homeland Security 2. Manufacturing and Service Operations Research Operations Research in Nonprofit Organization Policy Modeling and Public Sector OR Forecasting Productivity and Efficiency in the Public Sector Inventory Sports Operations Research Location Logistics, Transportation Warehousing and Maintenance Telecommunications and Networking Product and Service Design Project Management

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the AJOR.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
