## TABLE OF CONTENTS

**Volume 3    Number 2**

**April 2013**

**Preparation and Properties of Two-Component and Double-Crosslinking Waterborne Polyurethane-Acrylic Dispersions**

N. Gao, Z. Zhang, Q. Z. Dong.....27

**Investigation into Failure in to Mining Wire Ropes—Effect of Crystallinity**

S. Devasahayam, V. Sahajwalla, M. Sng.....34

**Polyfluorene-Polytriarylamine Block Copolymer as an Additive for Electroluminescent Devices Based on Polymer Blends**

M. Jahanfar, Y. Tan, K. Tsuchiya, T. Shimomura, K. Ogino.....41

**Synthesis of Polyfluorene-Polytriarylamine Block Copolymer with Emitting Part at Junction Point for Light Emitting Applications**

M. Jahanfar, K. Suwa, K. Tsuchiya, K. Ogino.....46

**A Novel Biodegradable Poly (Hydroxybutanedioic Acid-co-2-hydroxypropane-1,2,3-tricarboxylic Acid) Copolymer for Water Treatment Applications**

N. M. Kumar, K. Kanny.....53

**Open Journal of Organic Polymer Materials (OJOPM)** is an international journal dedicated to the latest advancement of organic polymer materials. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of organic polymer materials.

## Subject Coverage

All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

- Additives for Polymers
- Advances in Polymer Characterization
- Applications of Polymer Materials in All Fields and Disciplines
- Bioactive and Compatible Polymers
- Biopolymers
- Carbohydrate Polymers
- Functional Polymer Materials
- High-Performance Polymer Materials
- Light-Emitting Polymers
- Liquid Crystalline Polymers
- Main-Chain and Side-Chain Ionic Polymers
- Organometallic Polymers
- Plastics, Elastomers and Combinations Thereof
- Polymer Composites and Nanocomposites
- Polymer Degradation and Stability
- Polymer Gels and Networks
- Polymeric Fibers and Porous Media
- Polymers for Photovoltaic Devices
- Reactive Polymers and Macromolecular Reactions
- Synthesis of Polymeric Materials

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

## ***What is SCIRP?***

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

## ***What is Open Access?***

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
