ETSN is an international refereed journal dedicated to publishing state-of-the-art research in the field of e-health applications in telecommunication systems and networks. The journal focuses on systems, algorithms, and applications of e-health and medical telecommunications. ETSN publishes original research as well as review papers in the following areas:

Biomedical communications	Healthcare applications
Biomedical sensors and instrumentation	Healthcare information systems
Biomedical signal processing	Healthcare systems and services in transition: e-health, telemedicine and conditions for innovation
Body area and sensor networks	Medical informatics
Clinical ICT application	Patient pathways and coordinated care
Collaborative technologies in e-health and telemedicine systems	Prevention and self-management
Consumer health informatics	Security and privacy issues of e-health systems
E-health and m-health systems	Wearable sensors and systems
E-health in public health	Wireless communications and mobility
Grids	

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.
