## Subject Coverage

The main purpose and goal of this journal is to synergize sociological imagination in the 21st century toward a critical understanding of new social and cultural forces that call for scientific interpretation and analysis of facts and values. Specifically, it seeks to:

- Promote analytical research and inquiry in socio-cultural aspects of human conditions that warrant scientific interventions;
- Develop sociological models and methods to unravel and resolve inter-and-intra-societal problems that cause dysfunctional behaviors among people, communities and nations;
- Foster interdisciplinarity as a vehicle of scientific dialogue and communication toward a better world.

These three main objectives may be further broken into a broad range of aspects and issues that fall within the encyclopedic scope of sociological inquiry and research. The Journal also publishes: 1) Short reports — 2-5 page papers in which an author can either present an idea with a theoretical background but has not yet completed the research needed for a complete paper, or preliminary data; 2) Book reviews — Comments and critiques.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
