**Applied Mathematics (AM)** is an international journal dedicated to the latest advancement of applied mathematics. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas.

## Subject Coverage

This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

- |  |                            |                                   |
|--|----------------------------|-----------------------------------|
| ● Applied Probability                            | ● Evolutionary Computation | ● Neural Networks                 |
| ● Applied Statistics                             | ● Financial Mathematics    | ● Nonlinear Processes in Physics  |
| ● Approximation Theory                           | ● Fuzzy Logic              | ● Numerical Analysis              |
| ● Chaos Theory                                   | ● Game Theory              | ● Operations Research             |
| ● Combinatorics                                  | ● Graph Theory             | ● Optimal Control                 |
| ● Complexity Theory                              | ● Information Theory       | ● Optimization                    |
| ● Computability Theory                           | ● Inverse Problems         | ● Ordinary Differential Equations |
| ● Computational Methods in Mechanics and Physics | ● Mathematical Biology     | ● Partial Differential Equations  |
| ● Continuum Mechanics                            | ● Mathematical Chemistry   | ● Probability Theory              |
| ● Control Theory                                 | ● Mathematical Economics   | ● Statistical Finance             |
| ● Cryptography                                   | ● Mathematical Physics     | ● Stochastic Processes            |

| ● Dynamical Systems                              | ● Mathematical Sociology   |                                   |
| ● Elastodynamics                                 | ● Matrix Computations      |                                   |

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of **Applied Mathematics**.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
