Open Journal of Safety Science and Technology (OJSST) is an international peer-reviewed, open access journal publishing in English original research studies, reviews in all aspects of branches of science. Symposia or workshop papers may be published as supplements.

## Subject Coverage

The field of Safety Science and Technology is the most challenging and hot topic among all branches of science. This field is also quite interdisciplinary in character. OJSST aims to publish research papers in the following areas:

- |   |  |
|---|--|
| Blast safety  | Performance and process of burning                   |
| Bridge safety engineering                               | Public security                                      |
| Coal, gas and rock burst                                | Safety assessment and risk analysis                  |
| Construction and building safety                        | Safety management                                    |
| Dam safety  | Safety monitoring and supervision                    |
| Emergency management and evacuation                     | Safety of chemical reaction tank and pressure vessel |
| Explosion performance and safety of hazardous materials | Safety of tunnel and metro construction              |
| Fatigue, lifetime and reliability                       | Slope stability                                      |
| Fire control and extinguishing                          | Smoke control  |
| Fire experiment and property research                   | Spontaneous combustion in coal mine                  |
| Fire extinguishing agent and fire equipment             | Theories and methods of safety science               |
| Gas and dust control in coal mine                       | Traffic and transportation safety                    |
| Gas explosion and safety                                | Ventilation  |
| Leakage of combustible and toxic materials              | Work safety in coal mine                             |
| Numerical simulation of fire                            | Other aspects of safety science and technology       |
| Occupational health and human behavior                  |  |
