Open Journal of Statistics (OJS) is an international journal dedicated to the latest advancement of statistics. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of statistics.

Subject Coverage

This journal invites original research and review papers that address the following issues in statistics. Topics of interest include, but are not limited to:

- Asymptotic statistics
- Bayesian Statistics
- Biostatistics
- Business statistics
- Causal Inference
- Chemometrics
- Computational statistics
- Data mining
- Decision theory
- Demography
- Descriptive statistics
- Design of experiments

- Econometrics
- Energy statistics
- Engineering statistics
- Estimation theory
- Graphic models and related theory
- High dimensional data analysis
- Multivaraite Analysis
- Non-parametric statistics
- Parametric Statistics
- Psychological statistics
- Regression Analysis
- Reliability

- Reliability engineering
- Sample survey
- Sampling theory
- Semiparametric Statistics
- Social statistics
- Statistical Analysis with complex data
- Statistical computing
- Statistical inference
- Statistical methods
- Survival Analysis
- Time series analysis

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the OJS.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
