Editor-in-Chief

Prof. Christian Corda

Section of Physics of Santa Rita School of Advanced
Academic Studies and Research, Italy

Editorial Board

Dr. Kazuharu Bamba

Fukushima University, Japan

Dr. Andrew Beckwith

Department of physics, PRC (visiting scholar)Chongqing University,
USA

Dr. Alexander Burinskii

Laboratory of Theoretical Physics in Nuclear Safety Institute of the
Russian Academy of Sciences, Russia

Prof. Farhad Darabi

Azərbaycan Şahid Mədanı University, Iran

Dr. Luca Fabbri

University of Bologna, Italy

Dr. Seyed Hossein Hendi

Shiraz University, Iran

Dr. Arun Kenath

Christ University, India

Dr. Huda E. Khalid

Mosul University, Iraq

Dr. Lino Miramonti

Università degli Studi di Milano, Italy

Dr. Hooman Moradpour

Research Institute for Astronomy and Astrophysics of Maragha
(RIAAM), Iran

Prof. Jorge Ovalle

Simón Bolívar University, Venezuela

Prof. Waldyr A. Rodrigues Jr.

Institute of Mathematics, Statistics and Scientific Computation State
University of Campinas (UNICAMP), Brazil

Prof. Matteo Luca Ruggiero

DISAT, Polytechnic University of Turin, Italy

Dr. Burra Gautam Sidharth

International Institute of Applicable Mathematics & Information
Sciences B.M. Birla Science Centre, India

Dr. Anirvan Sircar

Intel Corporation, USA

Dr. Lorenzo Zaninetti

Department of Physics, Italy

Table of Contents

Volume 5 Number 1

January 2019

The Origin of the Color Charge into Quarks

G. Guido.....1

How a Kerr-Newman Black Hole Leads to Criteria about If Gravity Is Quantum Due to Questions on If $(\Delta t)^5 + A_1 \cdot (\Delta t)^2 + A_2 = 0$ Is Solvable

A. W. Beckwith.....35

Is Quintessence an Indication of a Time-Varying Gravitational Constant?

C. Pilot.....41

Revisiting Laws of Black Hole Mechanics and Violation of Null Energy Condition

S. Mandal.....82

Solar System. Angular Momentum. New Physics

V. S. Netchitailo.....112

Generation Model of Particle Physics with Excited Rishon States

B. A. Robson.....140

Mitigation of ELMs by Electrostatic Field in Tokamaks

Z. T. Wang, X. C. Chen, Y. F. Yan, H. D. Li, Q. Liu, M. L. Mou, N. Wu, Z. H. Wang,
R. Ke, L. Nie, M. Xu.....149

General Relativity without Curved Space-Time (\mathbb{R})

A. K. Abou Layla.....156

Broken Charges Associated with Classical Spacetime Symmetries under Canonical Transformation in Real Scalar Field Theory

S. Mandal.....167

Galaxies “Boiling off” Electrons Due to the Photo-Electric Effect Leading to a New Model of the IGM and a Possible Mechanism for “Dark Matter”

L. Ashmore.....181

Identifying a Kaluza Klein Treatment of a Graviton Permitting a Deceleration Parameter $q(z)$ as an Alternative to Standard DE

A. W. Beckwith.....193

A Kaluza Klein Treatment of a Graviton and Deceleration Parameter $Q(Z)$ as an Alternative to Standard DE and Its Possible Link to Standard DE Equation of State as Given by Li, Li, Wang and Wang, in 2017

A. W. Beckwith.....208

Numerical Modeling of the Vapour Vortex Formation in the Short Heat Pipes

A. V. Seryakov.....218

How $(\Delta t)^5 + A_1 \cdot (\Delta t)^2 + A_2 = 0$ is Generally, in the Galois Sense Solvable for a Kerr-Newman Black Hole Affect Questions on the Opening and Closing of a Wormhole Throat and the Simplification of the Problem, Dramatically Speaking, If $d = 1$ (Kaluza Klein Theory) and Explaining the Lack of Overlap with the Results When Applying the Gauss-Lucas Theorem

A. W. Beckwith.....235

Spectra of Harmonic Oscillators with GUP and Extra Dimensions

B. R. Mu, R. Yu, D. M. Wang.....279

Journal of High Energy Physics, Gravitation and Cosmology

ISSN Print: 2380-4327 ISSN Online: 2380-4335

<http://www.scirp.org/journal/jhepgc>

Journal of High Energy Physics, Gravitation and Cosmology (JHEPGC) is a cutting edge research periodical aimed to be forward looking and innovative and, at the same time, remaining in the mainstream. In other words, we are all in favor of being open minded about alternatives to mainstream, but they must be properly formulated and plausible scientific proposals, supported by mathematical rigor. In fact, being open mind in Science is a good thing and we encourage mainstream as well as avant-garde research papers but they must be grounded in real science and of course meet with our refereeing standards.

The need for such a journal has become more than apparent when recent cosmological observation and measurement has made it clear that new discoveries (particularly the discovery of Dark Energy), the accelerated cosmic expansion and gravitational waves have shaken the very foundation of High Energy Physics, Gravitation and Cosmology. Thus we, on the one hand, need to be truly open minded, i.e. in the sense clarified above. On the other hand, we have to adhere as much as possible to our time tested theories and be guided even more than before by observations and experiments.

The Journal is intended to fulfill this double edge philosophy religiously. It goes without saying that the refereeing of submitted papers will be also both rigorous and swift. Following what we have said, the Journal will predictably cover, but will not be restricted only to, the following subjects:

Subject Coverage

- Accelerated Cosmic Expansion
- Advances in Mathematical Methods
- Astronomy and Astrophysics
- Black Holes
- Cosmic Quantum Entanglement
- Cosmic-Ray Physics
- Dark Energy
- Dark Matter
- Dimensional Regularization
- Extended Theories of Gravity
- Fractal Models of Space Time
- Gravitational Waves
- K-Theory
- Loop Quantum Gravity
- M-Theory
- N-Category Theory Applied to Physics and Cosmology
- Non-Commutative Geometry
- Non-Demolition Quantum Measurement
- Observational Techniques
- Phenomenological Oriented Theories of Particles and Field String Theories
- Quantum Field Theories in Curved Space Time
- Quantum Teleportation
- Renormalization
- Scale Relativity
- Theoretical and Experimental High Energy Physics
- Topological Defects
- Unification of Fundamental Interactions
- Varying Speed of Light
