Advances in Internet of Things is an international journal dedicated to the latest advancement of wireless engineering and technology. The goal of this journal is to provide a platform for scientists, students, academics and engineers all over the world to promote, share, and discuss various new issues and developments in different areas of Advances in Intemet of Things.

Editor-in-Chief

Prof. Ammar Rayes Cisco Systems, Inc, USA

Subject Coverage

The aim of the Advances in Internet of Things is to provide a forum for scientists and social workers to present and discuss issues in the impact of the Internet to the society and disseminate findings in scientific research on related subjects. The scope of the journal includes but is not limited to:

- Classification Methods
- Computer Vision
- Digital Libraries
- Gateway between Databases and Security
- Home Networking
- Image Processing
- Information Forensics, Information Security, Biometrics and Systems Applications that Incorporate These Features
- IP Multimedia Subsystem (IMS)
- IPTV
- IPTV Platform and Standards
- IPv6
- Mobile Ad Hoc Network (MANET) and Sensor Networks
- Networking Protocols
- Neural Computing
- Online Document Processing
- P2P Networking and System
- Securing Information Technology
- Smart Grid
- Text and Graphics Recognition
- Web Services

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the ***AIT***.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
