Modern Instrumentation (MI) is an international journal dedicated to the latest advancement of instrumentation. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of instrumentation.

All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

- ◆ Flow Measurement and Instrumentation
- ◆ Instruments and Experimental Techniques
- ◆ Nuclear Instruments and Methods
- ◆ Optoelectronics, Instrumentation and Data Processing
- ◆ Radiation Applications and Instrumentation
- ◆ Seismic Instruments
- ◆ Sensing and Instrumentation for Food Quality and Safety

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.
