<http://www.SciRP.org/journal/jasmi>

Journal of Analytical Sciences, Methods and Instrumentation (JASMI) is an international, specialized English-language journal devoted to publication of original contributions concerning all aspects of theory and practice of analytical sciences, measurement science, analytical methodology, experimental methods, experimental protocols, technical characterizations and instrumentation (sampling, analysis, electrochemistry, microscopy, spectroscopy, mechanical analysis, thermal analysis, separations, spectroscopy, chemical reactions and selectivity, imaging, surface analysis, and data processing among others).

It is an open-access, peer-reviewed journal describing scientific and technological advances in analytical sciences, experimental protocols, methods, and characterization techniques.

The journal publishes the highest quality original full articles, communications, notes, reviews, special issues and books.

Papers are acceptable provided they report important findings, novel insights or useful techniques within the scope of the journal. All manuscript must be prepared in English, and are subjected to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by prints in hard copy. It will be available through
