## TABLE OF CONTENTS

**Volume 4    Number 1**

**January 2014**

**Heat Transfer Analysis during External Chilling of Composite Material Castings through Experimental and Finite Element (FE) Modelling**

J. Hemanth.....1

**A Solute Pinning Approach to Solute Drag in Multi-Component Solid Solution Alloys**

E. Hersent, K. Marthinsen, E. Nes.....8

**Model for a UV Laser Based Local Polymer Surface Halogenation Process Using a Gaseous Precursor**

S. Kibben.....14

**Numerical Simulation on Effects of Electromagnetic Force on the Centrifugal Casting Process of High Speed Steel Roll**

M. H. Yuan, L. L. Cao, Y. Z. Xu, X. D. Song.....20

**Finite Element Method Investigation of the Effect of Cold Expansion Process on Fatigue Crack Growth in 6082 Aluminum Alloy**

A. Aid, Z. Semari, M. Benguediab.....25

**Finite Element Analysis of the Groove Pressing of Aluminum Alloy**

M. S. Ghazani, A. Vajd.....32

**Modelling of the Quantum Transport in Strained Si/SiGe/Si Superlattices Based P-i-n Infrared Photodetectors for 1.3 - 1.55  $\mu\text{m}$  Optical Communication**

N. Sfina, N. Yahyaoui, M. Said, J.-L. Lazzari.....37

<http://www.scirp.org/journal/mnsms>

**Modeling and Numerical Simulation of Material Science (MNSMS)** is an international peer-reviewed, open access journal publishing in English original research studies, reviews and case reports in all aspects of Material Science. Symposia or workshop papers may be published as supplements.

## Honorary Editor in Chief

**Prof. Kiet Tieu** University of Wollongong, Australia

## Executive Editor in Chief

**Prof. Hai-Liang Yu** Shenyang University, China

## Subject Coverage

All the manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copies. The journal publishes original papers including but not limited to the following fields:

- Application of modeling and numerical simulation methods in analysis of solidification, forming, welding, heat treatment, surface engineering, process of materials, include, ferrous metals and alloys, non-ferrous metals and alloys, biomaterials, carbons, ceramic materials, polymer, composites, and other advanced materials.
- New development of modeling and numerical simulations methods for analysis material processes, such as finite element method, finite difference method, boundary element method, slab method, crystal finite element method, CA, MD, statistical methods, artificial intelligence method.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

## *What is SCIRP?*

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

## *What is Open Access?*

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
