On the Stochastic Dominance of Portfolio Insurance Strategies

H. Maalej, J.-L. Prigent.....14

Transfer Policies with Discontinuous Lorenz Curves

J. Fellman.....28

Alternative Alphas from Hedge Fund ETF Speculation

P. C. L. Lin.....34

On Quantum Risk Modelling

C. E. Kountzakis, M. P. Koutsouraki.....43

Liquidity Management at the Zero Lower Bound and an Era of Activism in Central Banking

B. Herzog.....48

Uncertain Volatility Derivative Model Based on the Polynomial Chaos

S. Drakos.....55

Investment in Hydrogen Engine Must Be Ended with Failure

T. Q. Yun.....64

Multivariate Stochastic Volatility Estimation with Sparse Grid Integration

H. E. Esen.....68

An Econometric Approach to Incorporating Non-Normality in VaR Measurement

V. Gumbo, S. Siziba.....82

Modelling Stock Prices with Exponential Weighted Moving Average (EWMA)

A. W. Adewuyi.....99

LPM Density Functions for the Computation of the SD Efficient Set

F. Viole, D. Nawrocki.....105

Forecasting Outlier Occurrence in Stock Market Time Series Based on Wavelet Transform and Adaptive ELM Algorithm

N. Hosseinioun.....127

The Effects of Long Memory in Price Volatility of Inventories Pledged on Portfolio Optimization of Supply Chain Finance

J. He, J. Wang, X. L. Jiang.....134

The Risk Premium of Treasury Bonds in China

X. W. Wu.....156

Statistical Arbitrage in S&P500

S. Drakos.....166

Extended Correlations in Finance

M. Burgin, G. Meissner.....178

Empirical Analysis of Dynamic Linkages between China and International Stock Markets

T. C. Chiang, X. Y. Chen.....189

Burr Distribution as an Actuarial Risk Model and the Computation of Some of Its Actuarial Quantities Related to the Probability of Ruin

J. Das, D. C. Nath.....213

A Comparative Study of Equilibrium Equity Premium under Discrete Distributions of Jump Amplitudes

G. M. Mukupa, E. R. Offen, D. Kunda, E. M. Lungu.....232
