Editor-in-Chief

Prof. Christian Corda

Section of Physics of Santa Rita School of Advanced
Academic Studies and Research, Italy

Editorial Board

Dr. Alexander Burinskii

Laboratory of Theoretical Physics in Nuclear Safety Institute of the
Russian Academy of Sciences, Russia

Dr. Luca Fabbri

University of Bologna, Italy

Dr. Seyed Hossein Hendi

Shiraz University, Iran

Arun Kenath

Christ University, India

Dr. Huda E. Khalid

Mosul University, Iraq

Dr. Lino Miramonti

Università degli Studi di Milano, Italy

Prof. Jorge Ovalle

Simón Bolívar University, Venezuela

Prof. Waldyr A. Rodrigues Jr.

Institute of Mathematics, Statistics and Scientific Computation State
University of Campinas (UNICAMP), Brazil

Prof. Matteo Luca Ruggiero

DISAT, Polytechnic University of Turin, Italy

Dr. Burra Gautam Sidharth

International Institute of Applicable Mathematics & Information
Sciences B.M. Birla Science Centre, India

Dr. Anirvan Sircar

Intel Corporation, USA

Dr. Lorenzo Zaninetti

Department of Physics, Italy

Table of Contents

Volume 2 Number 3

July 2016

Gedanken Experiment for Delineating the Regime for the Start of Quantum Effects, and Their End, Using Turok's Perfect Bounce Criteria and Radii of a Bounce Maintaining Quantum Effects, as Delineated by Haggard and Rovelli

A. W. Beckwith.....287

Hubble's Constant

A. F. Palacios.....293

The Missing Mass Problem

A. F. Palacios.....298

Frequency Decay through Electromagnetic Radiation Absorption and Re-Emission by Inter-Galactic Dark Matter as an Alternate Explanation for the Hubble Constant

D. G. Taylor.....301

Cosmological Constant and Energy Density of Random Electromagnetic Field

I. A. Obukhov.....312

Ionic Migration in the Stars

A. F. Palacios.....320

About the Quasars

A. F. Palacios.....323

5D World-Universe Model. Gravitation

V. S. Netchitailo.....328

Can Thermal Input from a Prior Universe Account for Relic Graviton Production? Implications for the Cosmological Landscape

A. W. Beckwith.....344

Deceleration Parameter $Q(Z)$ and Examining If a Joint DM-DE Model Is Feasible, with a Revisit to the Question of Cosmic Singularities

A. Beckwith.....362

A Relativistic Escape Velocity Maximum of Light Speed

D. G. Taylor.....383

Relic Entropy Growth and Initial Big Bang Conditions, as a Subset of Quantum Information

A. W. Beckwith.....392

Can Thermal Input from a Prior Universe Account for Relic Graviton Production and Imply Usage of the Bogomolnyi Inequality, as a Bridge between Brane World Models and Loop Quantum Gravity in Early Universe Conditions?

A. W. Beckwith.....412

Vacuum-Matter Interaction through Hyper-Dimensional Time-Space Shifting

R. Burri.....432

Journal of High Energy Physics, Gravitation and Cosmology (JHEPGC)

Journal of High Energy Physics, Gravitation and Cosmology (JHEPGC) is a cutting edge research periodical aimed to be forward looking and innovative and, at the same time, remaining in the mainstream. In other words, we are all in favor of being open minded about alternatives to mainstream, but they must be properly formulated and plausible scientific proposals, supported by mathematical rigor. In fact, being open mind in Science is a good thing and we encourage mainstream as well as avant-garde research papers but they must be grounded in real science and of course meet with our refereeing standards.

The need for such a journal has become more than apparent when recent cosmological observation and measurement has made it clear that new discoveries (particularly the discovery of Dark Energy), the accelerated cosmic expansion and gravitational waves have shaken the very foundation of High Energy Physics, Gravitation and Cosmology. Thus we, on the one hand, need to be truly open minded, i.e. in the sense clarified above. On the other hand, we have to adhere as much as possible to our time tested theories and be guided even more than before by observations and experiments.

The Journal is intended to fulfill this double edge philosophy religiously. It goes without saying that the refereeing of submitted papers will be also both rigorous and swift. Following what we have said, the Journal will predictably cover, but will not be restricted only to, the following subjects:

Subject Coverage

- Accelerated Cosmic Expansion
- Advances in Mathematical Methods
- Astronomy and Astrophysics
- Black Holes
- Cosmic Quantum Entanglement
- Cosmic-Ray Physics
- Dark Energy
- Dark Matter
- Dimensional Regularization
- Extended Theories of Gravity
- Fractal Models of Space Time
- Gravitational Waves
- K-Theory
- Loop Quantum Gravity
- M-Theory
- N-Category Theory Applied to Physics and Cosmology
- Non-Commutative Geometry
- Non-Demolition Quantum Measurement
- Observational Techniques
- Phenomenological Oriented Theories of Particles and Field String Theories
- Quantum Field Theories in Curved Space Time
- Quantum Teleportation
- Renormalization
- Scale Relativity
- Theoretical and Experimental High Energy Physics
- Topological Defects
- Unification of Fundamental Interactions
- Varying Speed of Light

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
