# Advances in Molecular Imaging (AMI)

ISSN 2161-6728 (Print) ISSN 2161-6752 (Online) http://www.scirp.org/journal/ami

Advances in Molecular Imaging (AMI) is an international journal dedicated to the latest advancement of ordered algebraic structures. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of molecular imaging.

### **Subject Coverage**

Advances in Molecular Imaging is a peer-reviewed, open access journal that publishes original research articles, review articles, case reports, and clinical studies in all areas of molecular imaging. molecular imaging investigations of macromolecular targets involved in significant biological processes; design and evaluation of molecular probes used to investigate macromolecular targets and their functions; and study of in vivo animal models of disease for the development of new molecular diagnostics and therapeutics. Molecular imaging (i.e., PET, SPECT, MRI, MRS, optical imaging, autoradiography, etc) investigations of macromolecular targets (i.e. genes, receptors, enzymes) involved in significant biological processes. Technology involved in the design, synthesis and evaluation of molecular probes used to recognize, image, investigate macromolecular targets and the functions they perform.

# **Notes for Intending Authors**

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
