Zhejiang University, China
Prof. Zhixiang Wang
University of Alberta, Canada

Managing Executive Editor

Dr. Tingfeng Li
Tulane University, USA
TABLE OF CONTENTS
Volume 4, Number 3A, March 2013

Attachment of *Escherichia coli* to fine sediment particles within construction sediment basins
E. A. Kunkel, C. V. Privette, C. B. Sawyer, J. C. Hayes.................................................................407

Transposable elements in *Escherichia coli* antimicrobial resistance
A. Iyer, E. Barbour, E. Azhar, A. A. El Salabi, H. M. A. Hassan, I. Qadri, A. Chaudhary, A. Abuzenadah,
T. Kumasani, G. Damanhour, M. Alawi, T. Na’was, A. M. A. Nour, S. Harakeh........................................415

Use of *Escherichia coli* toxins in sepsis models
I. Burkovskiy, J. Zhou, C. Lehmann...................................................................................................424

An exploratory study of food safety and food handling: Examining ready-to-eat foods in independent delicatessen operations
D. Murray, C. Feldman, L. Lee, C. Schuckers..................................................................................430

PCR-DGGE analysis of earthworm gut bacteria diversity in stress of *Escherichia coli* O157:H7
Y. Zhang, G. C. Wang, Y. P. Wu, H. Zhao, Y. F. Zhang, Z. J. Sun..................................................437

Into the life and death: RecA a WISE factor working to integrate survival and evolution in *Escherichia coli*
J. M. G. Gómez..................................................................................................................................442

*Escherichia coli* in seafood: A brief overview
R. A. Costa........................................................................................................................................450

Metabolic regulation of *Escherichia coli* cultivated under anaerobic and aerobic conditions in response to the specific pathway gene knockouts
Y. Matsuoka, K. Shimizu....................................................................................................................455

Bacteriophages in *Escherichia coli* antimicrobial resistance
A. Iyer, E. Barbour, E. Azhar, I. Qadri, A. Chaudhary, A. Abuzenadah, T. Kumasani, G. Damanhour,
S. Bahijri, A. Al-Hejin, A. M. A. Nour, S. Harakeh.............................................................................469

Effect of *cra* gene mutation on the metabolism of *Escherichia coli* for a mixture of multiple carbon sources
R. L. Yao, H. Kurata, K. Shimizu........................................................................................................477

Vaccination against urinary tract infections caused by *E. coli*
H. W. Bauer, H. Shams, R. M. Bauer.................................................................................................487

Teraherz vibrational spectroscopy of *E. coli* and molecular constituents: Computational modeling and experiment
T. Globus, I. Sizov, B. Gelmont........................................................................................................493

The figure on the front cover is from the article published in Advances in Bioscience and Biotechnology, 2013, Vol. 4, No. 3A, pp. 493-503 by Tatiana Globus, *et al*.

Advances in Bioscience and Biotechnology (ABB) is an international journal dedicated to the latest advancement of biosciences. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of biosciences. All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy.

Subject Coverage
This journal invites original research and review papers that address the following issues in bioscience and biotechnology. Topics of interest include, but are not limited to:

- Aerobiology
- Anthropology
- Biochemical Genetics
- Biochemistry
- Bioinformatics
- Biological Engineering
- Biological Evolution
- Biomathematics
- Biophysics
- Biostatistics
- Botany
- Cytobiology
- Developmental Biology
- Ecology
- Entomology
- Enzyme Engineering
- Genetic Engineering
- Genetics
- Immunology
- Microbiology
- Molecular Biology
- Nano-Bio-Analysis
- Neurobiology
- Pathology
- Physiology
- Protein Engineering
- Radiation Biology
- Virology
- Zoology

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the ABB.

Notes for Intending Authors
Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handle electronically through the website. All papers are refereed through a peer review process. Authors are responsible for having their papers checked for style and grammar prior to submission to ABB. For more details about the submissions, please access the website.

Website and E-Mail

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

• High visibility for maximum global exposure with open access publishing model
• Rigorous peer review of research papers
• Prompt faster publication with less cost
• Guaranteed targeted, multidisciplinary audience
