

Special Issue on COVID-19 Diagnostics, Vaccines and Therapeutics

Call for Papers

COVID-19 is caused by a coronavirus called SARS-CoV-2. COVID-19 affects different people in different ways, and has a certain degree of impact on people's work and life. With the continuous spread of the virus, the research and development of COVID-19 vaccines has also become a hot topic in various countries. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **COVID-19 Diagnostics, Vaccines and Therapeutics**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **COVID-19 Diagnostics, Vaccines and Therapeutics**. Potential topics include, but are not limited to:

- Vaccine development and efficacy evaluation
- Vaccine technology
- Immune system and response
- Antiviral therapy
- Clinical features, diagnosis, and treatment
- Viruses and chronic diseases
- COVID-19 infection and transmission
- Infection prevention and control
- COVID-19 and critical care
- Viral genomics

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - COVID-19 Diagnostics, Vaccines and Therapeutics**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	March 14th, 2021
Publication Date	May 2021

Guest Editor:

Scientific Research
Open Access

**Advances in Bioscience
and Biotechnology**
ISSN Online: 2156-8502
