

Special Issue on Biology and Bioengineering

Call for Papers

Biology and Bioengineering focuses on the application of engineering principles to analyze biological systems and to solve problems in the interfacing of such systems as plant, animal, microbial with human-designed machines, structures, processes and instrumentation. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Biology and Bioengineering.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Biology and Bioengineering**. Potential topics include, but are not limited to:

- Biochemical engineering
- Biomechanical engineering
- Biomedical engineering
- Biopharmaceuticals
- Bioprocess engineering
- Energy systems engineering
- Environmental health engineering
- Metabolic engineering
- Microbial fuel cells
- Molecular bioengineering
- Nucleic acid engineering
- Pharmaceutical & Biotechnology
- Physiological engineering
- Soil and water engineering

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Biology and Bioengineering**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 15th, 2024
---------------------	----------------

Publication Date	July 2024
------------------	-----------
