

Special Issue on Bioscience and Molecular Biology

Call for Papers

Bioscience and Molecular Biology focuses on the study of living organisms at the cellular and molecular levels. It encompasses diverse areas such as genetics, genomics, proteomics, and molecular biology techniques. Through the use of advanced laboratory techniques and analytical tools, scientists in this field contribute to understanding the complexities of life, unraveling disease mechanisms, and developing novel applications in areas such as medicine, agriculture, and biotechnology. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Bioscience and Molecular Biology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Bioscience and Molecular Biology**. Potential topics include, but are not limited to:

- Biomolecular Engineering
- Cell biology
- DNA technology
- Genetic engineering
- Genomics
- Molecular biology techniques
- Molecular cloning
- Molecular diagnostics
- Molecular evolution
- Molecular genetics
- Molecular medicine
- Molecular microbiology
- Molecular signaling
- Proteomics
- Virology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Bioscience and Molecular Biology**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 10th, 2024
Publication Date	December 2024
