

Special Issue on Photochemical Science

Call for Papers

Photochemical Science is the branch of chemistry concerned with the chemical effects of light, which is of immense importance in nature as it is the basis of photosynthesis, vision, and the formation of vitamin D with sunlight. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Photochemical Science.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Photochemical Science**. Potential topics include, but are not limited to:

- Bioluminescence
- Chemiluminescence
- Fluorescence
- Luminescence
- Phosphorescence
- Photochemical oxidant
- Photochemical reaction
- Photochemical rearrangements
- Photochemical smog
- Photodegradation
- Photodissociation
- Photodynamic therapy
- Photoexcitation
- Photolysis
- Photosensitization
- Photosynthesis
- Ultraviolet light

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Photochemical Science**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	July 28th, 2022
Publication Date	September 2022
