

Special Issue on Biological Chemistry and Biotechnology

Call for Papers

Biological chemistry studies the chemical processes within and relating to living organisms, which uses the tools of chemistry and synthesis to understand biology and disease pathways at the molecular level. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Biological Chemistry and Biotechnology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Biological Chemistry and Biotechnology**. Potential topics include, but are not limited to:

- Biological chemistry
- Molecular biology
- Genetics
- Gene expression
- Protein synthesis
- Enzymes
- DNA sequencing
- Recombinant DNA technology
- Genetic engineering
- Biopharmaceuticals
- Biocatalysis
- Metabolic engineering
- Drug discovery
- Protein engineering
- Synthetic biology
- Genomic editing
- Tissue engineering
- Biomedical devices

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Biological Chemistry and Biotechnology**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	September 10th, 2024
Publication Date	November 2024
