

Special Issue on Chemical and Pharmaceutical

Call for Papers

The chemical and pharmaceutical industry is global, innovative and complex; and faces specific environmental challenges in each of its segments. Basic and special chemicals are widely represented in our daily lives: thousands of substances known for their performance, are used by other industries and integrated into consumer products. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Chemical and Pharmaceutical**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Chemical and Pharmaceutical**. In this special issue, potential topics include, but are not limited to:

- Pharmaceutical technology
- Drug synthesis reaction
- Natural product research
- Pharmaceutics
- Novel drug delivery
- Pharmacokinetics
- Pharmaceutical/medicinal chemistry
- Molecular drug design
- Pharmaceutical analysis
- Design, synthesis and optimization of novel biologically active molecules with significant potential as new pharmacological agents, tools, probes or potential drugs
- Effect of molecular structure on the distribution, pharmacokinetics, and metabolic transformation of biologically active compounds

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Chemical and Pharmaceutical**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	March 30th 2024
Publication Date	May 2024

Scientific Research
Open Access

**Advances in Chemical
Engineering and Science**
ISSN Online:2160-0406
