**TABLE OF CONTENTS**

Volume 3 Number 4 October 2013

Spatial and Temporal Variation of Normalized Difference Vegetation Index (NDVI) and Rainfall in the North East Arid Zone of Nigeria
C. F. Olusegun, Z. D. Adeyewa.................................................................421

Pollution Characteristics of PM$_{2.5}$ during a Typical Haze Episode in Xiamen, China

Southern and Tropical Indian Ocean SST: A Possible Predictor of Winter Monsoon Rainfall over South India
R. P. Shukla, S. Rai, A. C. Pandey.................................................................440

Analysis of the Meteorological Variables for Puebla City 2011-2012 Applying the Modeling Ion-Wavelets in a Hypothetical Manner
R. Ramos-Aguilar, P. Máximo-Romero, B. S. Soto-Cruz, S. Alcántara-Iniesta, J. G. Pérez-Luna.................................................................450

Gamma-Rays in Association with the Rocket-Triggered Lightning Caused by Neutron Bursts
G. S. Paiva, C. A. Taft, M. C. Carvalho, N. C. Furtado.................................................................459

Model-Measurement Comparison of Ammonia Bi-Directional Air-Surface Exchange Fluxes over Agricultural Fields
Z. S. He, L. P. Wright, L. Zhang.................................................................465

Variation of Total Ozone during 24 August 2005 Magnetic Storm: A Case Study
G. A. Mansilla.................................................................475

The Neutron Flux Variation in the Earth’s Atmosphere Depending on the Solar Proton Flux
M. Poje, B. Vuković, M. V. Pajtler, V. Radolić, I. Miklavčič, J. Planinić.................................................................481

Chemical Composition and Sources of Rainwater Collected at a Semi-Rural Site in Ya’an, Southwestern China

What Controls Recent Changes in the Circulation of the Southern Hemisphere: Polar Stratospheric or Equatorial Surface Temperatures?
I. Orlanski.................................................................497

Air Pollution by Carbon Monoxide (CO) Poisonous Gas in Lagos Area Southwestern Nigeria
K. S. John, K. Feyisayo.................................................................510

Granger Causality Analyses for Climatic Attribution
A. Attanasio, A. Pasini, U. Triacca.................................................................515
Stable Boundary Layer Height Parameterization: Learning from Artificial Neural Networks
W. Li

Surface Temperature Anomalies in the River Niger Basin Development Authority Areas, Nigeria
J. S. Babatolu, R. T. Akinmubi

Analysis of Storm Structure over Africa Using the Trmm Precipitation Radar Data
A. R. Balogun, Z. D. Adeyewa

On the Downscaling of Meteorological Fields Using Recurrent Networks for Modelling the Water Balance in a Meso-Scale Catchment Area of Saxony, Germany
R. Kronenberg, K. Barfus, J. Franke, C. Bernhofer

Source Apportionment of PM$_{2.5}$ in the Metropolitan Area of Costa Rica Using Receptor Models

Determination of Instantaneous Frequencies of Low Plasma Waves in the Magnetosheath Using Empirical Mode Decomposition (EMD) and Hilbert Transform (HT)
E. U. Nathaniel, N. J. George, S. E. Etuk

Hans A. Panofsky’s Integral Similarity Function—At Fifty
G. Kramm, D. J. Amaya, T. Foken, N. Mölders

Rainfall Infiltration Return Frequency Estimates

Solar Activity, Solar Wind and Geomagnetic Signatures
J.-L. Zerbo, F. Ouattara, C. A. Mazaudier, J.-P. Legrand, J. D. Richardson

Effects of Sky Conditions Measured by the Clearness Index on the Estimation of Solar Radiation Using a Digital Elevation Model
M. de C. Alves, L. Sanches, J. de S. Nogueira, V. A. M. Silva

The Energy Cycle Associated to the Pacific Walker Circulation and Its Relationship to ENSO
J. A. P. Veiga, A. B. Pezza, T. Ambrizzi, V. B. Rao, S. H. Franchito, M. C. Yoshida

The figure on the front cover is from the article published in Atmospheric and Climate Sciences, 2013, Vol. 3, No. 4, pp. 552-561 by Rico Kronenberg, Klemens Barfus, Johannes Franke and Christian Bernhofer.

Editor-in-Chief
Dr. Shaocai Yu  U.S. Environmental Protection Agency, USA

Subject Coverage
This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

ACS aims to rapidly publish original scientific papers in all the fields of applied and/or climate atmospheric science. It covers the latest achievements and developments in the applied climate and atmospheric sciences, including but not limited to the following scopes as well as the theoretical and practical aspects of these disciplines:

- Agricultural climatology
- Air chemistry and the boundary layer, clouds and weather modification
- Air quality, atmosphere & health
- Applied meteorology
- Atmospheric acoustics, electricity, optics, physics, radiation and sounding
- Atmospheric and oceanic physics
- Atmospheric and solar-terrestrial physics
- Atmospheric chemistry
- Atmospheric environment
- Aviation climatology
- Biometeorology
- Building climatology and forestry climatology
- Climate change and broadcast meteorology
- Climate dynamics and variability
- Climate policy
- Clouds and precipitation physics
- Cosmical meteorology
- Dendroclimatolog
- Dynamics of atmospheres and ocean
- Hydrology, oceans and atmosphere
- Hydrometeorology
- Marine meteorology and meteorology-associated geophysics
- Medical meteorology and medical climatology
- Meteorological, climatological and atmospheric environmental issues
- Navigation climatology
- Phenology and paleoclimatology
- Polar meteorology
- Radar meteorology and radio meteorology
- Remote sensing
- Satellite meteorology and synoptic meteorology
- Theoretical and applied climatology
- Tropical meteorology
- Weather systems, numerical weather prediction

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the ACS.

Notes for Intending Authors
Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

Website and E-Mail

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

• High visibility for maximum global exposure with open access publishing model
• Rigorous peer review of research papers
• Prompt faster publication with less cost
• Guaranteed targeted, multidisciplinary audience
