

Special Issue on Climate Policy

Call for Papers

Climate policy research involves the study of various strategies, measures, and initiatives aimed at addressing climate change and promoting sustainability. This field of research examines the development, implementation, and evaluation of policies and regulations at national, regional, and international levels that aim to reduce greenhouse gas emissions, adapt to changing climate conditions, and mitigate the impacts of global warming. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **climate policy**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **climate policy**. In this special issue, potential topics include, but are not limited to:

- Increased use of renewable energy
- International climate agreements
- Climate finance
- Land use and forestry policy
- Urban planning and transportation policy
- Improved energy efficiency in buildings, industry, household appliances
- Reduction of CO₂ emissions from new passenger cars
- Measures to reduce emissions from landfills
- Adaptation to climate change
- Applications of atmospheric physics

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Climate Policy**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 10th, 2025
Publication Date	April 2025
