

Special Issue on Insect Pests of *Jatropha Curcas* and their Control in Burkina Faso

Call for Papers

The increasing interest on the potentials of *jatropha* has encouraged growers to venture into commercial farming. However, this expansion would require more rigid management strategies. As production of tree-seeds basically depends on cultural practices, one of the problems that farmers usually encounter in wide-scale *jatropha* plantations is insect pest management.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **insect pests of *jatropha curcas* and their control in Burkina Faso**. Potential topics include, but are not limited to:

- Agricultural entomology
- Pest bio-control
- Chemical protection of plants

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – *Insect Pests of Jatropha Curcas and their Control in Burkina Faso***” should be selected during your submission.

Special Issue timetable:

Submission Deadline	July 20th, 2016
Publication Date	August 2016

Guest Editor:

Dr. Harsimran Kaur Gill (University of Florida, USA)
