## **Special Issue on History of Science**

## **Call for Papers**

The history of science is the development of science over time, which encompasses three major branches of science: natural, social, and formal. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of History of Science.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **History of Science**. Potential topics include, but are not limited to:

- Advances in genetics
- Calculus and Newtonian mechanics
- Discovery of Neptune
- Economic history
- Emergence of chemistry
- Engineering history
- Evolution and inheritance
- Founding of psychology
- Germ theory
- Historiography of science
- Labor history
- Modern sociology
- Neuroscience
- Number system and geometry
- Planets and orbits
- Plate tectonics
- Schools of economics
- Scientific revolution
- Social history
- Space exploration
- Developments in astronomy
- Developments in geology
- Developments in mathematics
- Developments in mechanics
- Developments in medicine
- Developments in physics
- Developments in political science
- Developments in psychology, sociology, and anthropology

Authors should read over the journal's <u>For Authors</u> carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's <u>Paper Submission System</u>.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue -** *History of Science*" should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 28th, 2024
Publication Date	October 2024
