

Special Issue on Viral Hepatitis

Call for Papers

Viral hepatitis is liver inflammation due to a viral infection. It may present in acute form as a recent infection with relatively rapid onset, or in chronic form. The most common causes of viral hepatitis are the five unrelated hepatotropic viruses hepatitis A, B, C, D, and E. Other viruses can also cause liver inflammation, including cytomegalovirus, Epstein-Barr virus, and yellow fever. There also have been scores of recorded cases of viral hepatitis caused by herpes simplex virus.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Viral Hepatitis**. Potential topics include, but are not limited to:

- Types, symptoms and treatment
- Pathophysiology
- Epidemiology, transmission and prevention
- Molecular diagnosis
- Viral hepatitis and hepatocellular carcinoma
- Antiviral therapy
- Clinical practice and care
- Viral infections and other diseases
- Chronic hepatitis and complications
- Viral hepatitis in pregnancy
- Vaccination
- Innovative strategies
- Risk factors

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Viral Hepatitis**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 5th, 2021
Publication Date	May 2021

Scientific Research
Open Access

Advances in Infectious Diseases

ISSN Online: 2164-2656
