

Special Issue on Microbiology and Infectious Diseases

Call for Papers

An infectious disease, also known as a transmissible disease or communicable disease, is an illness resulting from an infection. Infections can be caused by a wide range of pathogens, most prominently bacteria and viruses. The study of microorganisms, the most abundant living entities on Earth, aims to understand their unique biology and the influence they have on human health, disease, and life in general.

Infectious diseases is a medical specialty dealing with the diagnosis and treatment of infections. The human body is heavily fortified against attack by disease-causing agents.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Microbiology and Infectious Diseases**. Potential topics include, but are not limited to:

- Clinical microbiology & infectious diseases
- Viral infections
- Bacterial infections
- Fungal infections
- Immunology and pathogenesis
- Molecular pathology
- Epidemiological studies
- Transmission and control
- Genetics
- HIV and AIDS
- Viral hepatitis
- COVID-19

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Microbiology and Infectious Diseases**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 21st, 2022
---------------------	---------------------

Scientific Research
Open Access

Advances in Infectious Diseases

ISSN Online: 2164-2656

Publication Date	February 2023
------------------	---------------
