

Special Issue on Infectious Diseases and Public Health

Call for Papers

Public health is a discipline dedicated to improving the health of populations by preventing diseases and injuries before they occur. Analyzing the health of a population and the threats it faces is the basis for public health. Infectious diseases is a medical specialty dealing with the diagnosis and treatment of complex infections. Both infection control and public health are focused on preventing the spread of disease.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Infectious Diseases and Public Health**. Potential topics include, but are not limited to:

- Epidemiology and health statistics
- Emerging infectious diseases
- Surveillance, prevention and control
- Public health promotion
- Transmission models
- Environmental epidemiology
- Primary healthcare system
- Immunology and infectious diseases
- Vaccination and public health
- Public health microbiology
- Community based interventions
- Risk assessments
- Social epidemiology
- COVID-19 and public health
- Outbreaks and responses

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Infectious Diseases and Public Health**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 9th, 2023
Publication Date	March 2023
