Special Issue on Environmental Pollutant Analysis

Call for Papers

Environmental pollutants are chemicals that have ended up in the environment as the result of human activites and that are hazardous to health. Finns are exposed to environmental pollutants mainly through food, but also through inhalation. At present, analytics and environmental monitoring are among the most dynamically developing branches of chemical analysis. The pursuit of getting the complex information on environmental quality leads to developing new methods and analytical techniques. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **environmental pollutant analysis**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **environmental pollutant analysis**. In this special issue, potential topics include, but are not limited to:

- Dioxins Analysis
- Pollutant monitoring
- Water Quality Testing
- Sampling methodology
- Techniques for remote measurements
- Detection and identification of organic pollutants in water
- Method validation and chemometrics in environmental analysis.

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Environmental Pollutant Analysis***" should be selected during your submission.

Special Issue timetable:

Submission Deadline	July 17th, 2020
Publication Date	September 2020
