

Special Issue on Effects of Climate Change on Health

Call for Papers

Climate change is already impacting health in a myriad of ways, including by leading to death and illness from increasingly frequent extreme weather events, such as heatwaves, storms and floods, the disruption of food systems, increases in zoonoses and food-, water- and vector-borne diseases, and mental health issues. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in **Effects of Climate Change on Health**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Effects of Climate Change on Health**. Potential topics include, but are not limited to:

- Climate-sensitive health risks
- Climate-sensitive infectious diseases
- Respiratory and cardiovascular disease related to extreme weather events
- Injuries and premature deaths related to extreme weather events
- Changes in the prevalence and geographical distribution of food- and water-borne illnesses
- Nino phenomena and health
- Threats to food and water quality and quantity and effects on our mental health

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Effects of Climate Change on Health**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 29th, 2024
Publication Date	November 2024
