Editor-in-Chief

Prof. Jose C. Valverde  Department of Mathematics, University of Castilla-La Mancha, Spain

Editorial Board

Prof. Huseyin Bor  Erciyes University, Turkey
Dr. İbrahim Buyukyazici  Gazi University, Turkey
Prof. Singa Wang Chiu  Chaoyang University of Technology, Chinese Taipei
Prof. Yuan-Shyi Peter Chiu  Chaoyang University of Technology, Chinese Taipei
Dr. Dragana S. Cvetković  University of Nis, Serbia
Dr. Mohamed K. El-Daou  Kuwait University, Kuwait
Prof. Yuri Anatolyevich Farkov  Russian State Geological Prospecting University, Russia
Prof. Ahmed Fouad Ghaleb  Cairo University, Egypt
Prof. Stanislaw Migorski  Jagiellonian University, Poland
Prof. Gangrong Qu  Beijing Jiaotong University, China
Dr. Fathalla A. Rihan  Helwan University, Egypt
Dr. Victor Rukavishnikov  Russian Academy of Sciences, Russia
Prof. Nickolas S. Sapidis  University of Western Macedonia, Greece
Dr. Nicolae Adrian Secelean  Lucian Blaga University, Romania
Prof. Yi-Fa Tang  Chinese Academy of Sciences, China
Prof. Michael Gr. Voskoglou  Graduate Technological Educational Institute of Patras, Greece
Prof. Joab Ron Winkler  The University of Sheffield, UK
Prof. Jinyun Yuan  Federal University of Parana, Brazil
Prof. Kewen Zhao  Qiongzhou University, Hainan, China
Dr. Su Zheng  Genentech, Inc., USA
# TABLE OF CONTENTS

**Volume 3  Number 4  December 2013**

**Half-Step Continuous Block Method for the Solutions of Modeled Problems of Ordinary Differential Equations**  
A. A. James, A. O. Adesanya, J. Sunday, D. G. Yakubu .................................................. 261

**On the Rate of Convergence of Some New Modified Iterative Schemes**  
R. Chugh, S. Kumar ............................................................................................................. 270

**A New Recombination Tree Algorithm for Mean-Reverting Interest-Rate Dynamics**  
P. C. L. Lin ............................................................................................................................ 291

**Run-Up Flow of a Maxwell Fluid through a Parallel Plate Channel**  
S. Y. Qadri, M. V. Krishna .................................................................................................. 297

**Characterization of Periodic Eigenfunctions of the Fourier Transform Operator**  
C. de Souza, D. W. Kammler ............................................................................................... 304

**Unsteady Incompressible Couette Flow Problem for the Eyring-Powell Model with Porous Walls**  
H. Zaman, M. A. Shah, M. Ibrahim ....................................................................................... 313

**The Correlation and Linear Regression Analysis between Annual GDP Growth Rate and Money Laundering in Albania during the Period 2007-2011**  
L. Sota, F. Kolaneci .............................................................................................................. 326

**Predicting Rainfall Using the Principles of Fuzzy Set Theory and Reliability Analysis**  
M. Hasan, S. Md. M. Khan, C. Putcha, A. Al-Hamdan, C. M. Glenn .................................. 337

**Dispersion Effect on Traveling Wave Solution of K-dV Equation**  
R. Karim, A. Alim, L. S. Andallah ....................................................................................... 349

**Fast Finite Difference Solutions of the Three Dimensional Poisson’s Equation in Cylindrical Coordinates**  
A. Shiferaw, R. C. Mittal ..................................................................................................... 356

**Analysis and Characterization of Flow-Generated Sound**  
D. Surek ................................................................................................................................. 362

---

The figure on the front cover is from the article published in American Journal of Computational Mathematics, 2013, Vol. 3, No. 4, pp. 297-303 by Syed Yedulla Qadri and M. Veera Krishna.

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: ajcm@scirp.org
American Journal of Computational Mathematics (AJCM) is a journal dedicated to providing a platform for publication of articles about mathematical research in areas of science where computing plays a central and essential role emphasizing algorithms, numerical methods, and symbolic methods.

Subject Coverage

This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

- Computational Geometry
- Computational Linguistics
- Computational Science
- Computer-Assisted Research
- Computer Simulation
- Mathematics of Scientific Computation
- Numerical Methods
- Stochastic Methods
- Symbolic Computation and Computer Algebra Systems

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of American Journal of Computational Mathematics.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

Website and E-Mail

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
