

Special Issue on Psychological Economics

Call for Papers

Psychological Economics is an interdisciplinary field that combines the principles of psychology and economics to understand and explain economic behavior and decision-making processes. It explores the cognitive, emotional, and social factors that influence individual and collective economic choices, such as consumption patterns, investment decisions, and labor market dynamics. This field sheds light on how psychological biases, attitudes, and social influences impact economic outcomes and offers insights into designing effective policies, interventions, and incentives to promote responsible economic behavior and sustainable economic growth.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Psychological Economics**. Potential topics include, but are not limited to:

- Behavioral finance
- Behavioral game theory
- Cognitive biases
- Competitive cheap talk
- Consumption patterns
- Decision-making
- Economic phenomena
- Emotional influences
- Financial models
- Heuristics, framing and market inefficiencies
- Investment decisions
- Labor market dynamics
- Neuroeconomics
- Psychological factors
- Social influences

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Industrial Economics and Sustainable Development**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	March 6th, 2024
Publication Date	May 2024
